## **Syllabus of Soft Skill**

### **Program Outcome** 2024

You may have an elaborate set of hard skills such as coding, design, web development, editing, or management abilities as an employee. But hard skills are considered technical knowledge in a particular field and are insufficient to sustain in the workplace. You need soft skills to maintain interpersonal relationships with your colleagues and move upward in the hierarchy in your department and the organization. The best soft skills include critical thinking ability, problem-solving strategies, creativity, emotional quotient, and attitude toward other employees.

The importance of soft skills in the workplace is often underestimated. But they are essential to sharpen hard skills. Many organizations provide soft skills training to their employees. It creates an inspirational environment and encourages employees to improve their interpersonal skills.

### **Importance of Soft Skills**

1. Career progression and promotion
2. The modern workplace is interpersonal
3. Customers and clients demand soft skills
4. Improve your workplace productivity
5. The future workplace will rely on soft skills
6. Build professional relationships
7. Soft skills are hard to automate
8. Soft skills are in optimum demand by recruiters
9. Complement your hard skills
10. Make well-rounded hiring decisions
11. Showcase your desire to work long term
12. Increase your self-confidence

  
Principal  
Takshashila Mahavidyalaya  
Amravati - 444 806

Course Outcome: 2024

1. The students will have understood the importance of verbal, non-verbal and written communication in today's complex world. Students will also have learnt about how to do self-assessments, how negotiate etc. They will also have learnt the importance manners and etiquette in their social and work life.
2. Students will have understood the difference between Soft skills and hard skills and also how to work on and master important Soft skills.
3. After the completion of this course students' will have learnt about how to develop positive attitude, how to work on Emotional Intelligence. They will also have learnt about the strategies to set crystal clear goals, how to think independently and innovatively.
4. Students will have learnt how to make decisions when in dilemma, how to deal with complex problems and stress in the present world. They will also have learnt how to be a team player & how to develop leadership skills.
5. Under the topics like synonyms, antonyms students' vocabulary will have enriched with the advanced vocabulary acquisition. After the completion of this course students' verbal ability skills will have enhanced.

**TAKSHASHILA MAHAVIDYALAYA, AMRAVATI**  
**DEPARTMENT OF COMMERCE**

**Program Outcomes**    2023-24

**Course Objectives :**

1. Develop critical thinking to carry out investigation about various Human Rights issues objectively.
2. Equip them for pursuing master degree with skills to analyse violation of human rights, analyse, interpret the results and draw reasonable conclusions.
3. Aiming towards perfection and maximum harmony with the environment is the ideal goal for human race. But realizing this objective is easier said than done, as there are many impediments in implementing genetic principles to human beings.

**Course Outcomes :**

1. Human Rights also guarantee people the means necessary to satisfy their basic needs such as food, housing and education. By guaranteeing life, liberty, equality and security, human rights protect people against abuse by those who are more powerful.
2. Historical events such as Magna Carta, The American Declaration of Independence, The French Declaration of the Rights of Man and Citizen had been contributed to the Universal Declaration of Human Rights.
3. Indian Constitution ensures human rights by guaranteeing fundamental rights to every citizen of India.
4. Human Rights movements have been enriched by collective wisdom emerging from the tribal movement, peasant struggles, environmental movement, women's liberation movement, child rights movement, dalit movement and struggles of the differently abled persons.

**Academic Session 2023-2024**

**Programmed Specific Outcomes for**

**Subject : CORE JAVA**

**After completion of the course the student should able to:**

- 1. Understand basic concepts of Object Oriented Programming and Java Programming Constructs like constants, variables, operators and control statements.
- 2. Understand the concepts of classes, objects, method overloading, inheritance, arrays , strings and vectors.
- Understand the need for interfaces and how to achieve multiple inheritance in Java and the concepts of multi threading by using thread class and implementing Runnable interface.

**Java Programming Lab After completion of the course the student should able to:**

- Understand the basic concepts such as function Overloading, array and string manipulation in Java
- Use utility classes in the real time applications
- Understand the types of inheritance
- Implement packages,

**Takshahshila Mahavidyalya Amravati**

**Department Of Botany**

**Add On Course**

**'Plant tissue culture'**

**Session 2022-2023**

### **Programme Outcomes**

The plant tissue culture is widely used to produce clones of a plant in a method known as micro propagation. Different techniques of the plant tissue culture offers advantages over traditional methods of propagation, like: the production of exact copies of plants that produce particularly good flowers, fruits, or have other desirable traits are obtained, this can be used to quickly produce a mature plant, production of multiple plants in the absence of seed or pollinators to produce seeds, for cleaning a particular plants with viral and other infections and to quickly multiply these plants as 'cleaned stock' for horticulture and agriculture etc.

- Specialized knowledge in a range of current issues, including growth, nutrition, health and disease resistance, genetics and environmental interactions.
- Practical experience in Plant tissue culture, maintenance and breeding and rearing of ornamental plant.
- Quantitative skills such as statistical applications and digital technological applications, making themselves efficient for prospective employers.
- Essential research skills including project planning, literature reviewing, data analysis and interpretation which will be beneficial for future research career.
- Knowledge and skills required to assess the abundance and distribution of plant and to understand key elements of the provision of advice for tissue culture lab management.

- Thorough understanding of the physical and biological oceanography, biodiversity, trophic interactions, species survival and reproduction issues required to implement spatially explicit, sustainable ecosystem-base management, conservation and effective marine spatial planning.

### **Programme Specific Outcomes**

On completion of the program in Aquaculture a student will have attained the following unique skill sets.

- Quantitative and analytical aptitude to apply the statistical and computational skills to project planning, research and data management.
- In depth knowledge in specific areas such as biotechnological applications in aquaculture for ethically sustainable enhancement of production.
- Practical skills in tissue culture and shrimp nutrition and health management in tissue culture farms to assist scientifically managed farms.
- High employability potential in the processing industry due to the skill sets attained in post harvest technology.
- Applicable knowledge in farming of tissue culture to enable sustained availability of essential marine life for commercial utilization.

## Course Outcomes

- There are several applications of plant tissue culture. The outcomes of application of plant tissue culture are as follows:
- Micro propagation is widely used for the development and preparation of foliage and ornamental plants.
- By this technique, ornamental plants are produced in large numbers which are used for decoration purposes.
- Through the process of apical Meristem culture, virus free germplasm is produced.
- By obtaining the technique of somatic embryogenesis, several types of artificial synthetic seeds are produced.
- Plant tissue culture is used for the production of secondary metabolites in large quantities.
- Protoplasmic fusion enables the genomes of incompatible crops to form somatic hybrids together.
- Several methods of plant tissue cultures are employed in plants for the introduction of a foreign gene into the plant cells.
- Tissue culture also helps in the induction of haploid in case of another culture.
- Embryo culture technique is applied to overcome embryo abortion, seed dormancy. And self-sterility in seeds.
- Plant tissue culture is applied in the area of plant physiological and biochemical research fields to study the various aspects and mechanisms of a cell like cell cycle, metabolism, and nutritional, morphogenetic and developmental studies in plants.

10. Make well-rounded hiring decisions
11. Showcase your desire to work long term
12. Increase your self-confidence

**TAKSHASHILA MAHAVIDYALAYA, AMRAVATI**  
**DEPARTMENT OF COMMERCE**

**Program Outcomes** 2020-21

**Course Objectives :**

1. Develop critical thinking to carry out investigation about various Human Rights issues objectively.
2. Equip them for pursuing master degree with skills to analyse violation of human rights, analyse, interpret the results and draw reasonable conclusions.
3. Aiming towards perfection and maximum harmony with the environment is the ideal goal for human race. But realizing this objective is easier said than done, as there are many impediments in implementing genetic principles to human beings.

**Course Outcomes :**

1. Human Rights also guarantee people the means necessary to satisfy their basic needs such as food, housing and education. By guaranteeing life, liberty, equality and security, human rights protect people against abuse by those who are more powerful.
2. Historical events such as Magna Carta, The American Declaration of Independence, The French Declaration of the Rights of Man and Citizen had been contributed to the Universal Declaration of Human Rights.
3. Indian Constitution ensures human rights by guaranteeing fundamental rights to every citizen of India.
4. Human Rights movements have been enriched by collective wisdom emerging from the tribal movement, peasant struggles, environmental movement, women's liberation movement, child rights movement, dalit movement and struggles of the differently abled persons.
